Systems & Transportation Engineering | Data, AI-Assisted Tool Development, Urban Systems

EDUCATION

The University of Texas at Austin

Graduate Student, Civil Engineering / Sustainable Systems Engineering | 2024-Present

The University of Texas at Austin

M.S., Sustainable Design | 2020

Southwestern University

B.A., Mathematics | 2015

EXPERIENCE

Lee Engineering, LLC - Transportation Engineering Intern

Dallas, TX | Jun 8-Aug 19, 2026

- Developed a deterministic internal automation tool for a time-intensive TIA data workflow using Claude as a coding assistant and iterative review with multiple engineers.
- Built validation around reproducibility and engineering-required certainty rather than relying on generative AI for final engineering calculations.
- Pre-deployment estimate: potential to save 500+ staff hours annually and reduce project turnaround if adopted at expected usage; savings are not yet realized.
- Audited and iteratively improved developing internal AI-use guidelines, emphasizing practical use, reliability, and review.
- Supported four TIA site visits and helped validate field values while learning the existing engineering workflow.

AI Training & Evaluation - Contract Projects

GlobalLogic / partner organizations including Digitiv | 2024-2026

- Completed AI training/evaluation work during 2024 and 2025 and successfully completed additional short-term Digitiv contract work in 2026.
- Continues to receive periodic contract invitations as a previously validated worker.

The University of Texas at Austin - Graduate Research

Austin, TX | 2024-Present

- Researches pedestrian-scale urban heat exposure at signalized intersections using field measurements, GIS, weather/crash data, solar/shade geometry, and pedestrian behavior.

SELECTED TECHNICAL STRENGTHS

Python; GIS/ArcGIS; R; MATLAB; Git/GitHub; HTML/CSS/JavaScript; data analysis; statistical modeling; simulation/optimization; technical workflow automation; field data collection.

PUBLICATION & RECOGNITION

Coauthor, "A New Perspective on Finding the Viewpoint," Mathematics Magazine 90(4), 2017.

MAA Carl B. Allendoerfer Award, 2018.
